GREENGUARD® GOLD CERTIFICATION

Hush Acoustics has achieved full GreenGuard® Gold sustainability certification, a mark of excellence that ensures our products meet strict standards for low chemical emissions, promoting healthier indoor air quality.

This recognition gives architects, designers, and consumers confidence in choosing Hush for environmentally responsible solutions. Beyond sustainability, Hush's felt products offer excellent sound-absorbing properties, making them ideal for creating quieter, more comfortable spaces.

SUSTAINABILITY

Manufactured from 100% PET(60% recycled material), our felt products demonstrate our commitment to both environmental stewardship and functional design, contributing to a greener and quieter future. It comprising of flame-retardant fiber as new material ensuring ASTM E84 class A certification. The high strength of PET panels in comparison to its weight is the key to its superior energy efficiency.

FUNGAL RESISTANT

Independently tested by EMSL Canada, Hush P.E.T. felt showed zero mold growth under ASTM C1338 laboratory conditions, confirming exceptional durability.

WARRANTY

2 year limited warranty. See F.A.Q. page on our website for more information.

## INSTALLATION INSTRUCTIONS · *HANG-MOUNT*

1. Begin by placing the Bold wall panel face-down on a clean flat surface.

   *(Note; the top of the cloud will have small holes cut out for the installation hardware).*

2. Now, locate the EZmark plugs. Insert the plug into the bracket as shown below, ensuring the plug is pushed firmly all the way to the end of the narrow portion of the slot in the metal bracket.

   (Note; the pointed end of the plug should be facing out from the panel).

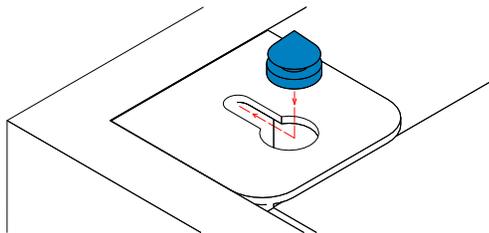

3. Repeat the process of adding the EZmark plugs to all remaining brackets on the Bold wall panel.
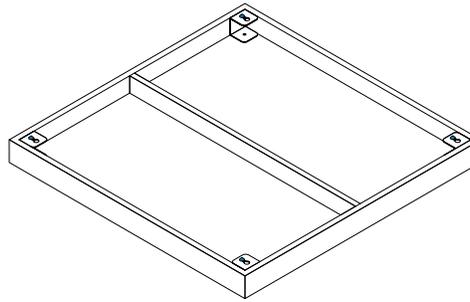

4. Now, holding the panel upright in the desired location, push the panel firmly against the wall, making sure to only push at the mounting brackets locations. This will cause the EZmark plugs to make small marking on the wall at each bracket location.
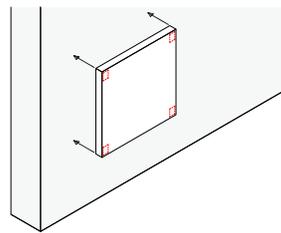

5. Using the small markings from the EZmark on the wall as a guide (A), secure your fastener to the wall (B).
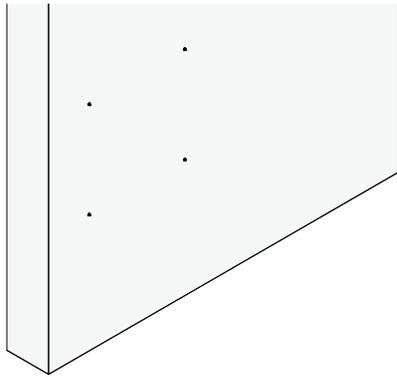

A   B
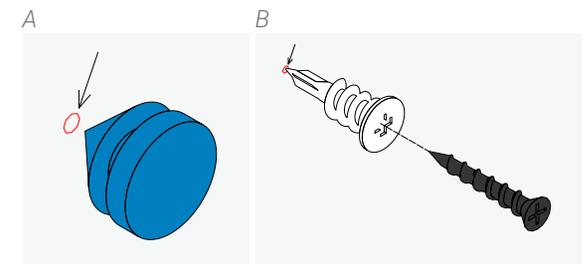

6. Secure your fastener to the wall, leaving about 6mm (1/4") remaining out from the wall.
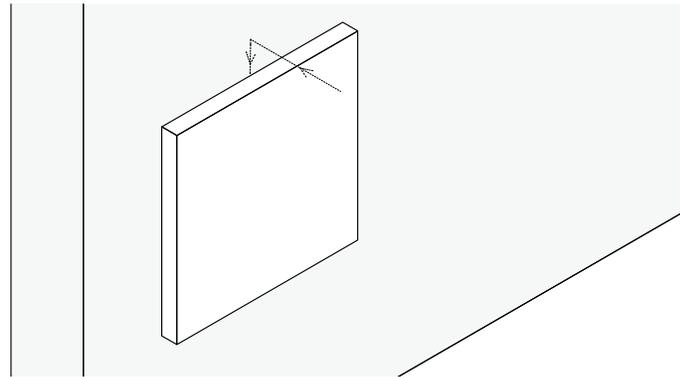

Bold

7. Repeat step 6 for remaining mounting locations of the Bold wall panel.

8. Now, remove the EZmark plugs from the Bold wall panel. The panel can now be mounted to the wall by aligning the fixings on the wall with the larger hole in the mounting brackets on the back of the Panel. With the Panel against the wall, gently push the Panel down, the Panel will lower by about 19mm (3/4") to seat the brackets securely onto the wall fixings. If the Panel does not lower, adjust the wall fixing screws as necessary.
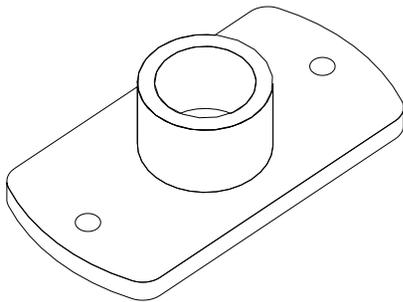

Bold

## INSTALLATION INSTRUCTIONS · *CLIP-MOUNT*

1. Place the Bold face down on a clean surface.
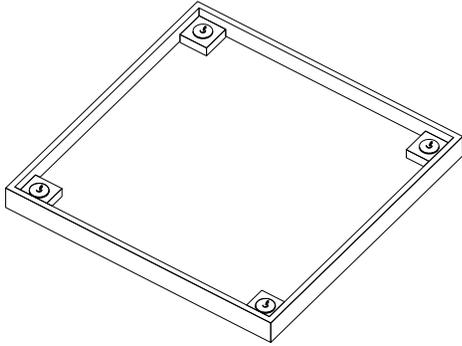

2. Now identify and locate the female portion of the Flush Mount clip as shown below.

3. Now mount the female portion of the clips onto the ceiling, using screws to suit your ceiling material.

4. Mount remaining clips to the ceiling - ensure that the center-to-center location of the female clips match the hardware locations on the back of the Bold panel.
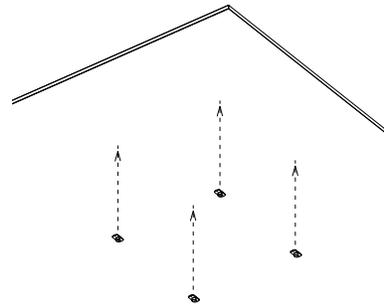

5. Now, push the Bold panel onto the hardware mounted on the ceiling, the hardware will 'click' into the ceiling hardware. Your Bold install is now complete.

COLOUR MATCH SERVICES

Can't find the tone you're looking for?
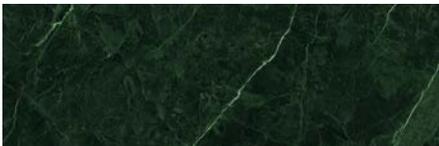

Hush Acoustics' felt Colour Match services enhance architectural projects with rich visuals and tactile appeal, whether for panels, murals, or other design applications. Our felt brings depth and sophistication to any space, offering a customizable and memorable design element that elevates the overall experience.

With advanced equipment, we produce high-resolution, colour-accurate results that capture subtle gradients and find textures, all while maintaining acoustic performance. Every Colour Match is carefully managed by our Senior Graphic Designer to ensure that the final output closely aligns with the designer's original vision.

Commonly Matched Materials (matte finishes only):

Wall Paints
Dulux, Benjamin Moore, Behr, and other popular brands

Fabric
From linen to wool, we match not just the colour, but also the texture in most of the cases

Wood Laminates
WilsonArt and other popular brands

Pantone® Hues
We simulate your company's brand tones using the Pantone® Uncoated palette

Stones
We can simulate a wide variety of stone types based on your needs

Generic Textures
Get in touch with our Acoustic Specialists, we will be glad to assist you
